

Live Inspired. Live in Art. *Cinch Adjustable Spacer*

What makes Rustica Hardware so unique?

Rustica Hardware is constantly refining the function behind our art. Our dedication to our customers experience is second to no one in the industry. Rustica Hardware's patented mounting hardware ensures an easy install to fast track redefining your home.

Patented Cinch Adjustable Spacer™ (Patent number: US 9,091.106 B2)

The Cinch Adjustable Spacer™ is the component that is installed between your track system and the wall. This unique innovation allows customers to control the distance between their wall to provide increased privacy for the room it's covering. This is a technology that is offered no where else in the industry. Our adjustable spacers are also very effective in situations where the wall is not an even or flat surface for your track to mount to.

Simply rotate one end of our Cinch Adjustable Spacer® to your desired Door location
