

UNASSEMBLED DOORS

Door parts example. Parts will depend on the model of door chosen.

Many Rustica Doors are offered either assembled or unassembled. The unassembled door will arrive in pieces and will include the hardware for putting it together and instructions for how to assemble the door. Tools required to assemble the door will be minimal - usually a rubber mallet, a screw driver or drill with a phillips screw bit, and occasionally a socket wrench. Door hardware, i.e., pulls or hangers, will need to be installed separately. Assembly time (excluding the addition of pulls and hangers) is approximately 45 minutes.

Follow the instructions carefully, then sit back and enjoy the afterglow of a job well done.
